

## PRINTER SELECTION SYSTEM AND METHOD

### Abstract of the Disclosure

- A system and method of selecting a printer from a plurality of printers to
- 5 fulfill a print job of a user includes providing a printer selection system controller having a printing capability of the printers registered therewith. The printer selection system controller compares a print request for the print job with the printing capability of the printers to determine which of the printers have the printing capability to fulfill the print job. As such, the printer selection system
- 10 controller compiles a list of at least one printer which has the printing capability to fulfill the print job and presents the list to the user.
